DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14, 23, and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims do not clearly set forth that the plurality of openings recited in claim 14, line 2 include the opening recited in parent claim 13, line 4.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-17, 19, 21, 23, and 25-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Atkins (U.S. Pat. No. 1,120,432).

Atkins discloses a roller for conveying a web comprising a first cylindrical tubular body g equipped with a plurality of radial holes r arranged in longitudinal rows. The tubular body g is capable of rotating with respect to a second inner fixed co-axial body q

Art Unit: 3654

and defining a suction chamber (between q, w, v, t, s). The roller includes sliding sealing elements s that resiliently engage the inner surface of the first cylindrical tubular body q due to the action of diaphragm v and springs y.

With regard to claim 16, bar s can slide in the groove formed by casting w.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18, 20, 22, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Atkins (U.S. Pat. No. 1,120,432) in view of the admitted prior art of paragraphs [0003] (p. 1) through [0008] (p. 3) of the specification.

Atkins is described above.

Atkins does not explicitly state that the apparatus is a machine selected from the group consisting of rewinding, winding, and interfolding machines.

The admitted prior art teaches using a conveying roller having a partial vacuum created inside the rollers in rewinding and interfolding machines to facilitate handling of web material.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the conveying roller of Atkins in a rewinding or interfolding

Art Unit: 3654

machine as taught by the admitted prior art to more efficiently provide the required gripping force on the web material as it is fed through the machine.

Response to Arguments

Applicant's arguments filed 7/31/06 have been fully considered but they are not persuasive.

Applicant argues that Faeber et al discloses multiple vacuum frames as opposed to sealing elements 7 that extend for the length of the roller. However, Atkins discloses a suction roller having sealing elements s that extend for the length of the roller.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. The new grounds of rejection were necessitated by the addition to claims 11 and 25 of the limitations that the slidable sealing elements and suction chamber extend for all the length of the roller. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 10/779,940 Page 5

Art Unit: 3654

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Haugland whose telephone number is (571) 272-6945. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
